REQUEST FOR RELOCATION OF RECEIVING GROUNDWATER MONITORING LOCATION IN WASTE DISCHARGE REQUIREMENTS (WDRs) AND NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT FOR SANTA CLARITA VALLEY SANITATION DISTRICT (SCVSD), SAUGUS WATER RECLAMATION PLANT (SAUGUS WRP), (ORDER NO. R4-2022-0175, NPDES NO. CA0054313, CI NO. 2960)

Dear Katie Marjanovic:

On August 12, 2025, the Los Angeles Regional Water Quality Control Board (Los Angeles Water Board) received a letter from SCVSD requesting relocation of the groundwater monitoring well in the Monitoring and Reporting Program (MRP) (CI-2960) contained in the Saugus WRP's NPDES permit (Attachment E to Order No. R4-2022-0175). On August 13, 2025, the Los Angeles Water Board staff requested that SCVSD submit similar information for this request that was provided for a related request in 2020 for a different well, including a comparison of the current well and the proposed replacement well, depth to groundwater, screening interval depth, and chloride concentrations for the past eighteen years. On August 26, 2025, SCVSD submitted the requested information. Section 8.2 in the MRP for Order No. R4-2022-0175 requires semi-annual groundwater sampling at station RGW-001, defined as Well No. 4N/16W-15P01S (Well S8). In February 2025, Santa Clarita Valley (SCV) Water Agency, the owner and operator of the water wells in the vicinity, took Well S8 offline for repairs. SCVSD will not be able to collect samples as specified in the MRP of Order No. R4-2022-0175 because Well S8 will remain offline for eighteen to twenty-four months. SCVSD evaluated nearby wells depicted in Figure 1, and proposes to use State Well Number 04N/16W-22C12S (Well N8) as a temporary alternative to Well S8 and assign Well N7 (No. 04N/16W-22C01S) as the temporary backup well.

After reviewing your request and the well evaluation information, the Los Angeles Water Board approves your request to temporarily assign Well N8 (No. 4N/16W-22C12S) as the designated well for groundwater sampling at station RGW-001 and assign Well N7 (No. 04N/16W-22C01S) as the temporary backup well for groundwater sampling at station RGW-001 (only if Well N8 becomes unavailable prior to the rehabilitation of Well S8). Well N8 and Well N7 are adequate substitutes for Well S8 because they are

located in the same aquifer, shows similar physical attributes, and similar water quality trends. Once SCV Water Agency completes rehabilitating Well S8, SCVSD shall notify the Los Angeles Water Board that Well S8 is back online and that groundwater monitoring will resume at Well S8.

If you have any questions regarding this proposed action, please contact Steven Webb at Steven.Webb@waterboards.ca.gov or at (213) 576-6793, or Veronica Cuevas at Veronica.Cuevas@waterboards.ca.gov or at (213) 576-6662.

Sincerely,

Jeong-Hee Lim
