

Los Angeles Regional Water Quality Control Board

March 26, 2024

William J. Winter, Assistant Deputy Director
Los Angeles County Department of Public Works
900 South Fremont Avenue
Alhambra, CA 91803

APPROVAL OF CLIMATE CHANGE EFFECTS VULNERABILITY ASSESSMENT AND MITIGATION PLAN FOR WASTE DISCHARGE REQUIREMENTS (WDRs) AND NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT FOR THE LOS ANGELES COUNTY DEPARTMENT OF PUBLIC WORKS, MALIBU MESA WATER RECLAMATION PLANT, MALIBU, CA (NPDES PERMIT NUMBER CA0059099, ORDER NUMBER R4-2021-0062)

Dear William Winter:

The Los Angeles Regional Water Quality Control Board (Los Angeles Water Board) received a *Climate Change Effects Vulnerability Assessment and Mitigation Plan* (Climate Change Plan) for the Malibu Mesa Water Reclamation Plant (Facility) from the Los Angeles County Department of Public Works (Discharger) on June 1, 2022. Order No. R4-2021-0062 requires the Discharger to submit a Climate Change Plan twelve months after the effective date of the Order, or June 1, 2022. The Climate Change Plan identifies and assesses the climate change vulnerabilities of the Facility in categories of flood, wildfire, extreme temperatures, drought, and high winds, and presents existing and additional resilience measures to address these vulnerabilities. The resilience measures are integral to the design and operation of the Facility and are intended to ensure that operations are not disrupted, the discharge continues to comply with permit conditions, and receiving waters are not adversely impacted by the discharge.

On February 13, 2023, the Los Angeles Water Board requested that the Climate Change Plan be revised to address the impacts of climate change related effects from each threat on the quality of the influent or effluent produced at the Facility and any mitigation measures that could be put in place to reduce any potential impact on the receiving water and beneficial uses. On January 25, 2024, the Discharger uploaded the revised Climate Change Plan dated December 2023 to the California Integrated Water Quality System. Los Angeles Water Board staff reviewed the revised Climate Change Plan and determined that all comments were addressed. The revised Climate Change Plan submitted on January 25, 2024, is hereby approved.
