

## Los Angeles Regional Water Quality Control Board

July 21, 2023

Lysa Gaboudian, Supervising Engineer  
County Sanitation Districts of Los Angeles County  
Joint Outfall System  
1955 Workman Mill Road  
Whittier, CA 90601

**ADMINISTRATIVE REVISIONS TO WASTE DISCHARGE REQUIREMENTS (WDRs)  
AND NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES)  
PERMIT – JOINT OUTFALL SYSTEM, JOINT WATER POLLUTION CONTROL  
PLANT, CARSON, CALIFORNIA (NPDES PERMIT NO. CA0053813, CI-1758)**

Dear Lysa Gaboudian:

On May 25, 2023, the Los Angeles Regional Water Quality Control Board (Los Angeles Water Board) adopted the NPDES permit Order No. R4-2023-0181 for the Joint Water Pollution Control Plant. The Los Angeles Water Board has determined minor modifications are needed in the Monitoring and Reporting Program (MRP) to modify the units required for acid volatile sulfides in sediment from mg/L to mg/kg in Table E-17 and to provide consistency between Table E-21 and section 10.4.5. In accordance with section 122.63 of Title 40 of the Code of Federal Regulations, the following administrative revisions shall be effective immediately:

1. The second paragraph of section 10.4.5. of the MRP requires the Receiving Water Biennial Report to be submitted in August of every other year, consistent with Table E-21. However, the third paragraph of section 10.4.5. lists September due dates every other year for the Receiving Water Biennial Report. The third paragraph of Section 10.4.5. of the MRP shall read as follows:

“The first assessment report shall be due ~~August~~ September 1, 2024, and cover the sampling periods of January-December 2022 and January-December 2023. Subsequent reports shall be due ~~August~~ September 1, 2026, and ~~August~~ September 1, 2028, to cover sampling periods from January 2024 to December 2025, and January 2026 to December 2027, respectively.”

2. The appropriate units for reporting acid volatile sulfides in sediment is mg/kg; however, Table E-17 of the MRP requires acid volatile sulfides to be reported in mg/L. Table E-17 shall read as follows for acid volatile sulfides:

| Parameter              | Units                           | Sample Type                                                     | Minimum Sampling Frequency | Notes |
|------------------------|---------------------------------|-----------------------------------------------------------------|----------------------------|-------|
| Acid volatile sulfides | <del>mg/L</del><br><u>mg/kg</u> | 0.1 square meter Van Veen grab (upper 2 centimeters, porewater) | annually                   | a, b  |

If you have any questions, please contact Steven Webb at [Steven.Webb@waterboards.ca.gov](mailto:Steven.Webb@waterboards.ca.gov) or at (213) 576-6793, or Don Tsai at [Don.Tsai@waterboards.ca.gov](mailto:Don.Tsai@waterboards.ca.gov) or at (213) 576-6681.

Sincerely,

for Susana Arredondo  
Executive Officer
