ELECTRONIC SELF-MONITORING REPORT REVIEW – NEWHALL RANCH WATER RECLAMATION PLANT, NEWHALL, CA (ORDER NO. R4-2013-0180, NPDES PERMIT NO. CA0064556, CI NO. 9322)

Dear Mr. Burger:

The discharge of wastewater to surface waters by Newhall Ranch Sanitation District (Permittee) from its Newhall Ranch Water Reclamation Plant (Facility) is regulated by Waste Discharge Requirements (WDRs) Order No. R4-2013-0180. The Monitoring and Reporting Program (MRP) of the WDRs requires monitoring for constituents and other parameters and specifies the location and frequency of monitoring. The Permittee's MRP (Part X.B.1 page E-26) also requires the submittal of data electronically. On behalf of the Los Angeles Regional Water Quality Control Board (Regional Board), State Water Resources Control Board (State Board) staff has reviewed the electronic versions of the quarterly self-monitoring reports (eSMRs) submitted by the Permittee.

As part of the eSMR implementation process, Regional and State Board staff is completing reviews of each self-monitoring report. First, the paper version is reviewed for compliance with both the MRP and all the limits found in the WDRs. Second, the electronic submittal is reviewed for consistency with the paper submittal. A "successful" submittal is one in which the electronic report contains the same information as the paper report and all the information required by the MRP. Once a Permittee submits three "successful" electronic reports, the Permittee will receive a letter stating that it will no longer need to submit paper reports.

State Board staff reviewed the annual 2012 and 2013 summary report and noted that there is currently no discharge as the facility is pending construction. While typically we require the submittal of three "successful" eSMRs, because there has been no discharge and there is likely to be no discharge in the immediate future, and given the relative ease of submitting reports of no discharge, State Water Board staff is satisfied with the reports the Permittee has submitted. Therefore, if the Permittee is also sending paper SMRs (via US mail or email), this is no longer necessary to comply with Order No. R4-2013-0180.

Please continue to submit eSMRs, and beginning with eSMRs due on or after June 15, 2014, such as the 1st Quarter 2014 SMR, the eSMR submittals will be the legal documents which Regional Board staff will review for completeness and compliance for Newhall Ranch Water Reclamation Plant to comply with Order No. R4-2013-0180.

State Board staff is providing the following guidelines for the submittal of future monthly and annual electronic monitoring reports:

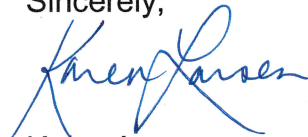

1. In general, if all monitoring data for a monitoring location can be submitted using the Permittee Entry Template (PET) Tool, then it should be submitted in eSMR as a CDF file upload. However, data for certain parameters, such as instream bioassessments, cannot currently be uploaded using the PET Tool and should be uploaded as a PDF, Microsoft Word, or Microsoft Excel file attachment.
2. For future electronic reporting, monitoring data should be submitted as follows:

Monitoring Type	Monitoring Frequency*	Report Format
Influent	Continuous, Weekly, Monthly Quarterly, Semiannually	CDF file
Effluent	Continuous, Daily, Weekly, Monthly Quarterly, Semiannually	CDF file
Effluent Toxicity	Monthly, Quarterly	CDF file, PDF, Word or Excel Attachment
Receiving Waters (Surface)	Monthly, Quarterly, Semiannually, Annually	CDF file, PDF, Word, or Excel Attachment
Groundwater	Quarterly, Semiannually	CDF file
CEC Monitoring	Annually	CDF file

*Submit with the applicable quarterly or annual report

If you have any questions, please contact Erin Mustain at (916) 445-9379 or by email at emustain@waterboards.ca.gov.

Sincerely,

Karen Larsen
