

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

ORDER R5-2018-0067

The California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board), finds that the Central Valley Water Board adopted the following Orders which are no longer applicable for the reasons shown:

a. **BUTTE COUNTY, ROCKY BLUFFS & SKANSEN**

Waste Discharge Requirements Order 92-211, adopted on 22 October 1992, prescribes requirements for the discharge from the Butte County, Rock Bluffs and Skansen, County Service Area No. 21, Butte County (Facility). The Facility is comprised of a subsurface disposal field and two treatment ponds. The Facility is now regulated under Water Quality Order 2014-0153-DWQ (General Order) for discharges to land from small domestic systems with a maximum average daily flow of 100,000 gallons or less. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 92-211.

b. **BUTTE COUNTY, STIRLING CITY**

Waste Discharge Requirements Order 96-048, adopted on 23 February 1996, prescribes requirements for the discharge from Butte County, Stirling City, County Service Area No. 82, Butte County (Facility). The Facility is comprised of three 13,230-gallon septic tanks and three facultative treatment ponds. The Facility is now regulated under Water Quality Order 2014-0153-DWQ (General Order) for discharges to land from small domestic systems with a maximum average daily flow of 100,000 gallons or less. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 96-048.

c. **CALAVERAS COUNTY WATER DISTRICT**

Waste Discharge Requirements Order R5-2003-0101, adopted on 6 June 2003, prescribes waste discharge requirements for the Calaveras County Water District's Wallace Lake Estates Wastewater Treatment Facility (WWTF) in Calaveras County. The WWTF is now regulated under the State Water Resources Control Board *General Waste Discharge Requirements for Small Domestic Wastewater Treatment Systems*, Order WQ 2014-0153-DWQ. Therefore, it is appropriate to rescind Waste Discharge Requirements Order R5-2003-0101

d. **CARITAS ACQUISITION'S CASTLE CITY MOBILE**

Waste Discharge Requirements Order 98-049, adopted on 27 February 1998, prescribes requirements for the discharge from Caritas Acquisition's Castle City Mobile Home Park WWTF in Placer County (Facility). The Facility is now regulated under State Water Board General Order WQ 2014-0153-DWQ for small domestic wastewater treatment systems. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 98-049.

e. **CITY OF VISALIA, WATER CONSERVATION PLANT, TULARE COUNTY**

Waste Discharge Requirements Order R5-2014-0076 (NPDES No. CA0079189), adopted on 6 June 2014, prescribes requirements for the City of Visalia's (Discharger) Water Conservation Plant (Facility) in Tulare County. Time Schedule Order R5-2014-0077 was also adopted on 6 June 2014 to provide the Discharger a schedule to come into compliance with limitations contained in Order R5-2014-0076 for copper and ammonia into Mill Creek, a water of the United States. The Discharger's primary method of compliance with the new effluent limitations was to

upgrade the Facility to increase its recycled water use. Given the expanded reclamation capacity, the Discharger is now able to dispose of the entire incoming flow without utilizing the NPDES discharge point to Mill Creek. On 23 May 2018, the Central Valley Water Board issued a Notice of Applicability to the Discharger for coverage of its upgraded recycled water use under Order WQ 2016-0068-DDW *Water Reclamation Requirements for Recycled Water Use*. On 31 May 2018, the Central Valley Water Board adopted Waste Discharge Requirements Order R5-2018-0046 for the Facility's discharge to Discharger-owned land and contracted users. Discharges at the Facility are now fully covered under the Notice of Applicability and the new Waste Discharge Requirements; thus, Order R5-2014-0076/NPDES Permit and Time Schedule Order R5-2014-0077 are no longer necessary.

f. **SAN JOAQUIN COUNTY, DEPARTMENT OF PUBLIC WORKS**

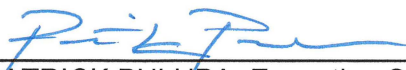

Waste Discharge Requirements Order R5-2004-0078, adopted on 4 June 2004, prescribes requirements for the discharge of wastewater from the County Service Area 44 Zone G (Linne) Wastewater Treatment Plant in San Joaquin County. The facility consists of a small wastewater treatment facility for the disposal of domestic wastewater. The Central Valley Region Water Quality Control Board received a Report of Waste Discharge, dated July 2017, from the Discharger requesting coverage under Statewide General Order 2014-0153-DWQ for Small Domestic Wastewater Treatment Systems. Regulation of the discharge was enrolled for coverage under General Order WQ 2014-0153-DWQ-R5267 on 3 May 2018. Therefore, it is appropriate to rescind Order R5-2004-0078.

g. **UNITED STATES DEPARTMENT OF INTERIOR**

The United States Department of the Interior, Bureau of Reclamation owns and operates an Administrative Center and Oak Shores Recreational Area in Napa County. Waste Discharge Requirements Order 5-00-202, adopted on 15 September 2000 prescribes requirements for the operation of a lined evaporation pond and subsurface leach fields and filter back wash water from a water treatment plant at the facility to an unlined evaporation/percolation pond. The Central Valley Region Water Quality Control Board received a Report of Waste Discharge, dated 31 July 2017, from the Discharger for coverage under the Statewide General Order 2014-0153-DWQ for Small Domestic Wastewater Treatment Systems. Regulation of the discharge to the lined ponds and leach field systems was enrolled under the General Order WQ 2014-0153-DWQ-R5294. Monitoring and Reporting Program R5-2018-0811 was issued to the Discharger for continued monitoring of filter backwash discharges to the unlined pond. Therefore, it is appropriate to rescind Waste Discharge Requirements Order 55-00-202.

IT IS HEREBY ORDERED that the above Orders are rescinded on the date of this order unless otherwise stated above.

I, PATRICK PULUPA, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region on August 2, 2018.

PATRICK PULUPA, Executive Officer
