**NOTICE OF ADOPTION
WASTE DISCHARGE REQUIREMENTS ORDER R5-2017-0094
NPDES PERMIT NO. CA0079651
FOR
LINDA COUNTY WATER DISTRICT
WASTEWATER TREATMENT PLANT
YUBA AND SUTTER COUNTIES**

Enclosed is Waste Discharge Requirements Order R5-2017-0094 (Order) for the Linda County Water District, Wastewater Treatment Plant, adopted by the California Regional Water Quality Control Board, Central Valley Region, with late revisions, on 11 August 2017. This Order becomes effective on 1 October 2017.

Please review the Order carefully to ensure that you understand all aspects of the waste discharge requirements. Please note that the Provisions section of the Order (Section VI of the Waste Discharge Requirements) requires submittal of specified technical reports and certification by the dates provided in the Order. These submittals include the items listed in Tables 1 and 2.

Table 1. Compliance Schedule for Special Studies and Technical Reports

Task	Special Studies, Technical Reports and Additional Monitoring Requirements (Section VI.C.7.a)	Due Date
i.	Mixing Zone Verification Study (Special Provision VI.C.2.b)	Within 24 months of commencing discharge from Discharge Point 001
ii.	Groundwater Dilution Verification Study Work Plan (Special Provision VI.C.2.c)	Due 1 March 2018
iii.	Groundwater Dilution Verification Study (Special Provision VI.C.2.c)	Due 1 November 2020
iv.	Groundwater Well Relocation Study (Special Provision VI.C.2.d.i)	Prior to developing new groundwater wells.

KARL E. LONGLEY ScD, P.E., CHAIR | PAMELA C. GREEDON P.E., BCEE, EXECUTIVE OFFICER

11020 Sun Center Drive #200, Rancho Cordova, CA 95670 | www.waterboards.ca.gov/centralvalley

Task	Special Studies, Technical Reports and Additional Monitoring Requirements (Section VI.C.7.a)	Due Date
v.	Groundwater Quality Study (Special Provision VI.C.2.d.ii)	Within 90 days of the completion of 12 months of monthly monitoring of the new groundwater wells
vi	Cyanide Study (Special Provision VI.C.2.e)	Due 1 February 2019

Table 2. Other Provisions

Other Required Progress and/or Technical Reports	Due Date
Salinity Evaluation and Minimization Plan, Annual Reports (Special Provision VI.C.3.a)	1 February , annually
Salinity Evaluation and Minimization Plan, Updated Plan (only submit if applicable – Special Provision VI.C.3.a)	1 April following the calendar year in which the effluent electrical conductivity annual average of 900 $\mu\text{mhos/cm}$ was exceeded

In addition to the technical reports required in the Provisions section of the Order, the Order also contains a Monitoring and Reporting Program (MRP). The MRP, located in Attachment E, contains specified monitoring requirements that you must implement. Please review the MRP closely so that you may establish the appropriate sampling schedules and protocols. In addition to the monthly, quarterly, and annual self-monitoring reports, the MRP requires the technical reports listed in Table 3.

Table 3. Technical Reports Required in the MRP (Attachment E)

MRP- Required Technical Reports	Due Date
Analytical Methods Report for the constituents listed in tables E-2, E-3, E-5, and E-6 (MRP section X.D.3.)	10 October 2017
Analytical Methods Report for the constituents listed in table E-7 (MRP section X.D.3.)	No less than 6 months prior to conducting Effluent and Receiving Water Characterization Monitoring
Annual Operations Report (MRP section X.D.4.)	30 January , annually

Special attention should be made to reporting monitoring results for effluent monitoring. Previous Order R5-2012-0034 included one effluent monitoring location name, EFF-001, in Table E-1 regardless of the discharge location. Review of effluent monitoring results under the location EFF-001 did not distinguish between a discharge to the Feather River or to the Percolation Ponds. The new Order R5-2017-0094 includes a new name for the effluent monitoring location, EFF-001/EFF-002, in Table E-1 for both discharge points. In the new Order R5-2017-0094, the effluent monitoring location EFF-001/EFF-002 is in the same physical location as the previous Order, however, the new Order requires that monitoring results are reported as EFF-001 if the samples were taken when discharging to Discharge Point 001

(Feather River) and reported as EFF-002 if the samples were taken when discharging to Discharge Point 002 (Percolation Ponds).

The Order becomes effective on 1 October 2017. Until that time, you will need to comply with the effluent limitations and requirements contained in previous Order R5-2012-0034 and Time Schedule Order R5-2011-0056-01. For your August and September 2017 self-monitoring reports, you will need to demonstrate compliance with previous Order R5-2012-0034 through 30 September 2017. For the October 2017 self-monitoring report, you will need to demonstrate compliance with the new Order R5-2017-0094 beginning 1 October 2017.

Please note that we have transitioned to a paperless office. Therefore, all documents other than monitoring reports, technical reports, and progress reports shall be converted to a searchable Portable Document Format (PDF) and submitted by email to centralvalleysacramento@waterboards.ca.gov. Please include the following information in the email: Attention: NPDES Compliance and Enforcement; Facility: Linda County Water District WWTP; and the CIWQS place ID 237060. Documents that are 50 MB or larger must be transferred to a CD, DVD, or flash drive and mailed to our office, attention "ECM Mailroom". Monitoring reports shall be submitted through eSMR.

Effective 1 October 2017, Linda County Water District is required to submit all of the technical and progress reports required by Order R5-2017-0094 (NPDES CA0079651) via CIWQS submittal. In general, if any monitoring data for a monitoring location can be submitted using a Computable Document Format (CDF) file upload, then it should be submitted as a CDF file upload, such as characterization monitoring data. However, certain parameters that cannot be uploaded to the CIWQS data tables, such as Annual Operations Reports, should be uploaded as a PDF, Microsoft Word, or Microsoft Excel file attachment. Also, please upload a cover letter summarizing the content of the report to the submittal tab of the CIWQS module for each submittal.

Now that your permit has been adopted, the Central Valley Water Board's Compliance and Enforcement section will take over management of your case. Ayda Soltani is your point of contact for any questions about the Order. If you find it necessary to make a change to your permitted operations, Ms. Soltani will direct you to the appropriate Permitting staff. You may contact Ms. Soltani at (916) 464-4634 or by email at ayda.soltani@waterboards.ca.gov.
