NOTICE OF APPLICABILITY

WATER QUALITY ORDER NO. 97-10-DWQ, GENERAL WASTE DISCHARGE REQUIREMENTS FOR DISCHARGES TO LAND BY SMALL DOMESTIC WASTEWATER TREATMENT SYSTEMS, DODGE RIDGE CORPORATION, DODGE RIDGE SKI AREA WASTE WATER TREATMENT FACILITY, TUOLUMNE COUNTY

The Dodge Ridge Ski Area Waste Water Treatment Facility (WWTF) consists of septic tanks and subsequent leach fields. Waste Discharge Requirements (WDRs) Order No. 89-248 currently regulates the WWTF discharge. The WDRs are obsolete, inconsistent with current plans and policies of the California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board), and need to be updated.

On 26 April 2011, Central Valley Water Board staff received a letter from you, requesting coverage of the discharge under *Water Quality Order No. 97-10-DWQ, General Waste Discharge Requirements for Discharges to Land by Small Domestic Wastewater Treatment Systems* (hereafter General Order).

Based on the findings of the original WDRs, information from self-monitoring reports and facility file, and information provided in your request, the discharge meets the conditions of the General Order. The discharge is hereby covered under *Water Quality Order No. 97-10-DWQ, General Waste Discharge Requirements for Discharges to Land by Small Domestic Wastewater Treatment Systems*. The facility is assigned Notice of Applicability (NOA) No. 97-10-DWQ-R5078.

The following requirements contained within the General Order apply to the subject discharge:

1. All Section A Prohibitions,
2. Section B Requirement Nos. 1.a-1.d, 2.a-2.c, and 5.a-5.b;
3. All Section C Ground Water and Surface Water Limitations;
4. Section D Provision Nos. 1.a-1.v, 2.a-2.b, and 4; and

5. All Attachment B Standard Provisions and Reporting for Waste Discharge Requirements.

The following sections of Attachment A Monitoring and Reporting Program (MRP) No. 97-10-DWQ, apply to the discharge:

1. Septic Tank Monitoring, and
2. Reporting.

LOCATION

The Dodge Ridge Corporation operates the WWTF about 4 miles southeast of Pinecrest, in Sections 23 and 24, T4N, R18E, MDB&M. The surface water drainage for the area contributes to the North Fork of the Tuolumne River near its headwaters.

The WWTF is in the San Joaquin River Basin. The *Water Quality Control Plan for the Sacramento and San Joaquin River Basins, Fourth Edition* (hereafter Basin Plan), designates beneficial uses, establishes water quality objectives, and contains implementation programs and policies to achieve water quality objectives for all waters of the Basin.

DESCRIPTION

The treatment and disposal facilities consist of 6 septic tanks that discharge to leach fields. These facilities provide utilities for the Mid Mountain Lodge, Family Lodge, Creekside Lodge and Rental Shop, and a maintenance building owned and operated by Dodge Ridge Corporation.

Peak flow for the combined septic tanks is about 13,000 gpd and is experienced less than 30 days per year. Due to the seasonal operations of the lodges and rental shop, for 6 months of the year flows are less than 300 gpd.

The natural surface water near the site is the Tuolumne River. The beneficial uses of the North Fork of the Tuolumne River are municipal and agricultural supply, recreation, aesthetic enjoyment, groundwater recharge, fresh water replenishment, and preservation and enhancement of fish, wildlife, and other aquatic resources.

The beneficial uses of underlying groundwater identified in the Basin Plan are: municipal and domestic supply, industrial service supply, industrial process supply, and agricultural supply.

FACILITY-SPECIFIC REQUIREMENTS

In addition to the above requirements, the Dodge Ridge Corporation must comply with the following:

1. Discharge of wastewater at a location or in a manner different from that described above is prohibited.

2. The WWTF shall be operated in accordance with the requirements contained in the General Order.
3. The waste discharge shall not enter surface waters or surface water drainage courses.
4. The Dodge Ridge Corporation shall submit the required annual fee (as specified in the annual billing issued by the State Water Resources Control Board), if applicable, until the NOA is officially terminated.
5. Failure to abide by the conditions of the General Order and this letter authorizing applicability, including its monitoring and reporting requirements, could result in enforcement actions, as authorized by provisions of the California Water Code.

If you have any questions regarding this NOA, please contact Dale Harvey at (559) 445-6190.

for Pamela C. Creedon
Executive Officer
