
Los Angeles Regional Water Quality Control Board

May 28, 2025

Ken Solomon, President
Top O'Topanga Community Association
3360 North Topanga Canyon Boulevard
Topanga, CA 90290

Via Email Only

TERMINATION OF COVERAGE UNDER GENERAL WASTE DISCHARGE REQUIREMENTS FOR AN ADVANCED ONSITE WASTEWATER TREATMENT SYSTEM FOR TOP O'TOPANGA COMMUNITY ASSOCIATION WASTEWATER TREATMENT SYSTEM LOCATED AT 3360 NORTH TOPANGA CANYON BOULEVARD, TOPANGA, CALIFORNIA 90290 (FILE NO. 61-149, ORDER NO. R4-2019-0024, SERIES NO. 066, CI-3185, GLOBAL ID WDR100000744)

Dear Ken Solomon:

The Los Angeles Regional Water Quality Control Board (Los Angeles Water Board) is the public agency responsible for protecting the quality of ground and surface water for all beneficial uses within the majority of Los Angeles and Ventura Counties. The subject property is located within the jurisdiction of the Los Angeles Water Board.

On April 29, 2025, the Top O'Topanga Community Association (the Association) Wastewater Treatment System (Facility), owned by the Association, was authorized to discharge disinfected secondary-treated recycled water under General Waste Discharge Requirements (WDRs) Order No. R4-2019-0024 (Series No. 066).

However, on May 22, 2025, and May 27, 2025, the Association requested modifications to the monitoring requirements outlined in Monitoring and Reporting Program (MRP) No. CI-3185. These requests were based on the Facility's current treatment capabilities and potential plans related to upgrading the Facility. Additionally, the Association sought to defer compliance with the General WDRs until such upgrades are completed.

In light of the Association's concerns, enrollment in the General WDRs at this time may be premature. Therefore, coverage of wastewater discharge under General WDRs Order No. R4-2019-0024 (Series No. 066) is hereby terminated. The existing Water Reclamation Requirements (WRRs) Order No. 97-071 will remain in effect until more information about the Facility's upgrade is available and the Facility can be enrolled in the General WDRs.

If you have any questions, please contact Water Resource Control Engineer Woonhoe Kim via email at woonhoe.kim@waterboards.ca.gov or Section Manager James Kang via email at jim.kang@waterboards.ca.gov.

Sincerely,

for Susana Arredondo
Executive Officer
