SUBJECT: Technical Review Comments
Underground Injection Control (UIC) Permit Renewal Application
Class V R9UIC-CA5-FY18-1RLA Biosolids TIRE, City of Los Angeles, California

Dear Mr. Rad:

The U.S. Environmental Protection Agency, Region 9 (EPA) has reviewed the City of LA's ("LA" or "the City") submittal entitled "Attachment 1, Response to EPA Technical Comments and Notice of Deficiency", transmitted via cover letter dated May 6, 2020. Our review focused on evaluating LA's most recent responses to EPA's questions on the permit renewal application. The attached document details results of our review and highlights specific questions, clarifications, and supplemental information that needs to be addressed before we can complete technical review of the permit application.

Please submit the information as described in the enclosure as soon as possible and no later than **August 20, 2020**. Please submit your response via email to Albright.David@epa.gov, and provide three hard copies by mail for our files. We will continue our technical review once we receive the information requested.

Thank you for your prompt attention to this matter. If you have questions, please contact me at (415) 972-3971 or you may contact Dave Basinger at (415) 972-3506.

Sincerely,

for David Albright
Manager, Groundwater Protection Section
