NOTICE OF APPLICABILITY (NOA), WATER QUALITY ORDER 97-10-DWQ-R5152, LAKEHEAD SAFETY ROADSIDE REST AREA, SHASTA COUNTY

In January 2014, the Lakehead SRRA (hereafter "Discharger") responded with information pertaining to the Central Valley Regional Water Board (Central Valley Water Board) staff's request for updated information for the domestic wastewater treatment and disposal system at their facility in Shasta County.

Based on the information provided, the facility treats and disposes of less than 20,000 gallons of wastewater per day, and is therefore eligible for coverage under the general and specific conditions of State Water Resources Control Board (State Water Board) Water Quality Order 97-10-DWQ *General Waste Discharge Requirements for Discharges to Land by Small Domestic Wastewater Treatment Systems* (General Order). This letter serves as formal notice that the General Order is applicable to your facility and the wastewater discharge described below. You are hereby assigned General Order 97-10-DWQ-R5152 for your facility.

You should familiarize yourself with the entire General Order and its attachments enclosed with this letter, which prescribes mandatory discharge and monitoring requirements. Sampling, monitoring, and reporting requirements that are applicable to your treatment and disposal methods must be completed in accordance with the sections of the General Order Attachment A; *Monitoring and Reporting Program* (MRP) and *Standard Provisions* Attachment B.

REGULATORY BACKGROUND

Waste Discharge Requirements (WDRs) 94-335 were adopted for this facility by the Central Valley Water Board on 9 December 1994. The existing MRP requires monthly reporting of wastewater flow and leachfield condition.

DISCHARGE DESCRIPTION

The Lakehead SRRA is a roadside rest area, located near the community of Lakehead, along Interstate 5 in Section 2, Township 35 North, Range 5 West, MDB&M in Shasta County. The facility is owned and operated by CA Department of Transportation. The overall developed site consists of a wastewater collection system, septic tank, and leachfield. The location is shown in Attachment A of this letter.

FACILITY SPECIFIC REQUIREMENTS

The Discharger will maintain exclusive control over the discharge, and shall comply with the terms and conditions of this NOA and the General Order 97-10-DWQ-R5152, with all attachments. Failure to comply with the requirements in the documents could result in an enforcement action as authorized by provisions of the California Water Code. Discharge of wastes other than those described in this NOA is prohibited. If the method of waste disposal changes from that described in this NOA, you must submit a new Report of Waste Discharge describing the new operation.

The required annual fee specified in the annual billing from the State Water Board shall be paid until this NOA is officially terminated. You must notify this office in writing if the discharge regulated by the General Order ceases, so that we may terminate coverage and avoid unnecessary billing.

Please note that WDRs Order No. 94-335 is proposed to be rescinded at the 5/6 June 2014 meeting of the Central Valley Water Board. Upon rescission of your individual WDRs, coverage for your facility under the General Order shall become applicable subject to this Notice of Applicability.

If you have any questions regarding submitting an updated report of waste discharge, making changes to your permitted operations, compliance or enforcement please contact Stephen Rooklidge at (530) 224-4205, Stephen.Rooklidge@waterboards.ca.gov, or the footer address.
