REVISED MONITORING AND REPORTING PROGRAM, AUBURN VALLEY CSD AND AUBURN VALLEY GOLF CLUB, INC., AUBURN VALLEY CSD WWTF, PLACER COUNTY

On 19 December 2017, the Discharger submitted a request via email to change Monitoring and Reporting Requirements (MRP) WQ 2014-0153-DWQ-R5249. The request included removing the monitoring requirement for turbidity from the *Disinfection System Monitoring* section of the MRP. We did not remove the turbidity monitoring requirement because it is necessary to verify low turbidity for efficient disinfection. However, it was noted that the monitoring frequency for turbidity and total coliform organisms were based on Title 22 requirements for recycled water. Since the primary purpose of the subsurface wastewater discharge is disposal and not recycling, Title 22 sampling and analysis requirements are not applicable to the discharge. Therefore, the monitoring frequency for total coliform organisms and turbidity were changed to monthly in the revised MRP (attached). This monitoring frequency is consistent with Auburn Valley CSD WWTF's previous monitoring requirements under WDR R5-2002-0030, which was rescinded after the discharge was enrolled under the Small Domestic General Order WQ 2014-0153-DWQ.

If you have any questions regarding this letter please contact Robin Merod at (916) 464-4697 or by email at robin.merod@waterboards.ca.gov.
