

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

ORDER NO. 82-007

WASTE DISCHARGE REQUIREMENTS
FOR
THE TULARE COUNTY HOUSING AUTHORITY
LINNELL FARM LABOR CENTER
TULARE COUNTY

The California Regional Water Quality Control Board, Central Valley Region, (hereafter Board) finds that:

1. The Tulare County Housing Authority (hereafter Discharger), which operates the Linnell Farm Labor Center, submitted a report of waste discharge, dated 5 April 1978.
2. The Linnell Farm Labor Center is located one mile (1.6 km) northwest of Farmersville in Section 1, T19S, R25E, MDB&M.
3. The existing waste treatment facility consists of an Imhoff tank, trickling filter and clarifier, with final disposal to three evaporation-percolation ponds on 1.4 acres (0.57 ha). Design average daily flow of the facility is 0.085 mgd (3.7 l/sec.) with present average daily flow at approximately 0.085 mgd (3.7 l/sec.)
4. The Board, on 20 March 1970, adopted Order No. 70-139 which prescribed requirements for a discharge from the Linnell Farm Labor Center wastewater treatment facility to evaporation-percolation ponds. Order No. 70-139 is no longer adequate nor consistent with current plans and policies of the Board.
5. The Discharger is currently in the process of upgrading the existing facility by means of a Clean Water Grant Project.
6. The new treatment facility will include rehabilitation of the headworks and Imhoff tank, construction of a 3-cell stabilization pond and expansion of the final disposal ponds to 2.1 acres (0.85 ha). Construction is scheduled to begin around 1 September 1981. Design average daily flow will be 0.13 mgd (5.7 l/sec.)
7. The beneficial uses of ground water are municipal, industrial, and agricultural supply.
8. The Board, on 25 July 1975, adopted a Water Quality Control Plan for the Tulare Lake Basin (5D) which contains water quality objectives. These requirements are consistent with that Plan.
9. The Tulare County Housing Authority has adopted a final environmental impact report in accordance with the California Environmental Quality Act, (Public Resources Code Section 21000, et seq.), and the State Guidelines.
10. The Board has reviewed the EIR and concurs there are no significant impacts on water quality.

WASTE DISCHARGE REQUIREMENTS
THE TULARE COUNTY HOUSING AUTHORITY
LINNELL FARM LABOR CENTER
TULARE COUNTY

-2-

11. The Board has notified the Discharger and interested agencies and persons of its intent to prescribe waste discharge requirements for this discharge and has provided them with an opportunity to submit their written views and recommendations.
12. The Board, in a public hearing, heard and considered all comments pertaining to the discharge.

IT IS HEREBY ORDERED, that Order No. 70-139 be rescinded and the Tulare County Housing Authority, Linnell Farm Labor Center, in order to meet the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder, shall comply with the following:

A. Discharge Prohibitions:

1. The direct discharge of wastes to surface waters or surface water drainage courses is prohibited.
2. The by-pass or overflow of untreated or partially treated waste is prohibited.

B. Discharge Specifications:

1. Neither the treatment nor the discharge shall cause a pollution or nuisance as defined by the California Water Code, Section 13050.
2. The discharge shall not cause degradation of any water supply.
3. The 30-day average daily dry weather discharge shall not exceed 0.13 mgd (5.7 l/sec.).
4. The dissolved oxygen content in any pond shall not be less than 1.0 mg/l for 16 hours in any 24-hour period.
5. The specific electrical conductance of the discharge shall not exceed 1000 micromhos/cm.

C. Provisions:

1. The Discharger shall comply with the attached Monitoring and Reporting Program No. 82-007.
2. The Discharger shall comply with the Standard Provisions and Reporting Requirements, dated 21 September 1979, which are part of this Order.
3. The Discharger shall report promptly, to the Board, any material change or proposed change in character, location, or volume of the discharge.

LINNELL FARM LABOR CENTER
TULARE COUNTY

-3-

4. The Discharger shall implement appropriate measures to preclude public access from the facility.
5. In the event of any change in control or ownership of land or waste discharge facilities presently owned or controlled by the Discharger, the Discharger shall notify the succeeding owner or operator of the existence of this Order by letter, a copy of which shall be forwarded to this office.
6. The Board will review this Order periodically and may revise requirements when necessary.

I, JAMES A. ROBERTSON, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region, on 22 January 1982.

JAMES A. ROBERTSON, Executive Officer

INFORMATION SHEET

THE TULARE COUNTY HOUSING AUTHORITY
LINNELL FARM LABOR CENTER
TULARE COUNTY

The Tulare County Housing Authority operates the Linnell Farm Labor Center which is located approximately one mile (1.6 km) northwest of Farmersville. The sewage treatment facility serving the Center was originally constructed in 1938 and is now severely deteriorated.

The existing treatment and disposal facility consists of a primary settling chamber, an Imhoff tank, a trickling filter and clarifier. The facility serves approximately 850 residents occupying 109 households. The average daily flow rate is about 85,000 gallons per day (3.7 l/sec.)

The Discharger is currently involved in a Clean Water Grant Project to upgrade the facility. Waste treatment will be by a rehabilitated Imhoff tank and by construction of a three-cell stabilization pond covering 5.63 surface acres (2.3 ha). The final disposal ponds will be increased from 1.4 acres (0.57 ha) to 2.1 surface acres (0.85 ha) in area to provide adequate percolation capacity. The entire treatment and disposal area will be fenced to preclude access to the public.

Soils in the area are identified as Foster fine sandy loam which are considered highly favorable for agricultural crops and have good drainage characteristics. The stabilization pond will be lined with Bentonite clay to control rapid percolation and maintain normal operating levels.

Depth to ground water in the spring of 1979 was approximately 30 feet (9.1 m). The mineral quality of local ground water is considered excellent with specific conductance at about 350 micromhos.

An Environmental Impact Report was prepared for the project during June 1979. The Regional Board has reviewed the EIR and concurs with the findings that no significant environmental impacts would be caused by the project.

MONITORING AND REPORTING PROGRAM NO. 82-007

FOR

THE TULARE COUNTY HOUSING AUTHORITY
LINNELL FARM LABOR CENTER
TULARE COUNTY

The Discharger shall implement the following monitoring and reporting program upon adoption of this Order:

EFFLUENT MONITORING

Representative samples shall be collected at the treatment facility according to the specified frequency:

<u>Measurement</u>	<u>Unit</u>	<u>Type of Sample</u>	<u>Frequency</u>
Total Daily Flow	mgd (l/sec)	Continuous	Daily
Dissolved Oxygen ^{1/}	mg/l	Grab	2/week
Specific Electrical Conductance @25°C	umhos/cm	Grab	Monthly

1/ Sample to be collected from a location opposite each pond inlet between the hours of 0800 and 0900.

REPORTING

Monitoring reports shall be submitted monthly to the Board by the 15th day of the following month. In reporting the monitoring data, the Discharger shall arrange the data in tabular form so that the date, the constituents, and the concentrations are readily discernible. The data shall be summarized in such a manner to illustrate clearly the compliance with waste discharge requirements.

The Discharger shall submit with the initial report, a diagram indicating the location of the sampling stations in relation to the treatment facility.
