**APPROVAL OF REDUCTION IN GROUNDWATER MONITORING FREQUENCY,
MONITORING AND REPORTING PROGRAM 2014-0153-DWQ-R5303, KERN
COUNTY, REEDER TRACT COUNTY SERVICE AREA 39.8, WASTEWATER
TREATMENT FACILITY, KERN COUNTY, CIWQS PLACE ID 252277**

The Kern County (Discharger) Reeder Tract County Service Area 39.8 wastewater treatment facility (WWTF) is regulated by State Water Resources Control Board Order WQ 2014-0153-DWQ, General Waste Discharge Requirements for Small Domestic Wastewater Treatment Systems (General Order). The WWTF is assigned Notice of Applicability 2014-0153-DWQ-R5303 for coverage under the General Order and is required to comply with Monitoring and Reporting Program 2014-0153-DWQ-R5303 (MRP).

The current MRP requires that groundwater monitoring be conducted semi-annually. In an email dated 2 March 2023, Jason Nordine, Wastewater System Manager for Kern County, requested a reduction in the frequency of groundwater monitoring from semi-annually to annually. In response to the request, Central Valley Regional Water Quality Control Board (Central Valley Water Board) staff reviewed the site background and results of groundwater monitoring performed between November 2019 and November 2022 for the WWTF. Central Valley Water Board staff's review is summarized in the attached staff memorandum.

Based on staff's review, the requested reduction of groundwater monitoring frequency is reasonable.

Pursuant to California Water Code section 13267 and effective with the date of this letter, the MRP is hereby amended, and the monitoring frequency for all constituents listed under the Groundwater Monitoring section of the MRP is annually. Place a copy of this letter with the copy of the MRP you maintain at the WWTF so evidence of the change will be available during staff inspections of the WWTF.
