Dear Mr. Mushegan:

Subject: Application for Update of Waste Discharge Order
Tranquillity Public Utility District WWTF – WDID: 5D100117001, Order No. 80-081

Enclosed is a Form 200 and a CD containing a Technical Report for the purpose of revising the Waste Discharge Requirements for the Tranquillity Public Utility District (TPUD, or the District). The District's wastewater treatment facility (WWTF) is currently identified as a Category 2 for Threat to Water Quality, and Category B for Complexity. The District requests that the Threat to Water Quality be amended to a Category 3 Threat to Water Quality (i.e., "discharges of waste that could degrade water quality without violating water quality objectives) and a Category C for Complexity. The District feels that the WWTF satisfies all requirements for a 3-C rating.

If approved, this would result in a reduction of the annual discharge fee levied against TPUD, and the resultant savings will allow the District to utilize these funds to better maintain both their collection and treatment facilities.

The current Waste Discharge Order 80-081 authorizes a maximum average discharge of 120,000 gpd (gallons per day). During the previous three calendar years (2016, 2017, and 2018), the daily discharge dry weather flow rate has averaged approximately 54,000 gpd.

Attached is a Technical Report describing the background history and current operations of the WWTF. Taking into account potential future growth over the next 25 years, the District is requesting that the annual discharge limit be reduced from 120,000 gpd to 70,000 gpd. Reduction of the discharge limit will bring it below the 100,000 upper limit established by the State Water Control Board for defining a small domestic wastewater treatment system. The District is requesting that continued use of the current facility be allowed.

If you have any questions regarding this application or the wastewater treatment facility operations, please contact the Engineer, Mike Giersch of Giersch and Associates, Inc. at telephone (559) 673-5981, extension 25.

Sincerely,

Michael Pucheu, Chairperson
Tranquillity Public Utility District Board

VI. OTHER REQUIRED INFORMATION

Please provide a COMPLETE characterization of your discharge. A complete characterization includes, but is not limited to, design and actual flows, a list of constituents and the discharge concentration of each constituent, a list of other appropriate waste discharge characteristics, a description and schematic drawing of all treatment processes, a description of any Best Management Practices (BMPs) used, and a description of disposal methods.

Also include a site map showing the location of the facility and, if you are submitting this application for an NPDES permit, identify the surface water to which you propose to discharge. Please try to limit your maps to a scale of 1:24,000 (7.5' USGS Quadrangle) or a street map, if more appropriate.

VII. OTHER

Attach additional sheets to explain any responses which need clarification. List attachments with titles and dates below:

You will be notified by a representative of the RWQCB within 30 days of receipt of your application. The notice will state if your application is complete or if there is additional information you must submit to complete your Application/Report of Waste Discharge, pursuant to Division 7, Section 13260 of the California Water Code.

VIII. CERTIFICATION

"I certify under penalty of law that this document, including all attachments and supplemental information, were prepared under my direction and supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."
