**REVISED MONITORING AND REPORTING PROGRAM 2014-0153-DWQ-R5288-01,
STRATFORD PUBLIC UTILITY DISTRICT, WASTEWATER TREATMENT FACILITY,
KINGS COUNTY, CIWQS PLACE ID: 273135**

Central Valley Regional Water Quality Control Board staff has revised Monitoring and Reporting Program (MRP) 2014-0153-DWQ-R5288 for the Stratford Public Utility District Wastewater Treatment Facility (WWTF). Please note that the original MRP issued on 30 July 2018 incorrectly listed its MRP number as 2014-0153-DWQ-R5277. The correct number was MRP 2014-0153-DWQ-R5288.

Stratford Public Utility District was granted funding to upgrade the WWTF in 2021, but the proposed upgrades have not been completed. Consequently, the effluent monitoring location described in the original MRP does not typically contain enough effluent for sampling. Additionally, if water is present at the monitoring location, it is primarily stormwater or from groundwater seepage; therefore, the MRP revision is necessary. Specifically, the effluent monitoring location is revised to provide representative effluent quality sampling for the WWTF's current evaporation/percolation pond configuration. **Revised MRP 2014-0153-DWQ-R5288-01** is enclosed, and supersedes MRP 2014-0153-DWQ-R5288, effective **1 January 2026**.

Should you have any questions regarding this matter, please contact Jennifer Dolores at (559) 710-1034 or Jennifer.Dolores@waterboards.ca.gov.

Omar Mostafa, P.E.
Senior Water Resource Control Engineer
