

## Los Angeles Regional Water Quality Control Board

July 25, 2023

Barbara Romero, Direct and General Manager  
City of Los Angeles, Bureau of Sanitation  
1149 S. Broadway 9<sup>th</sup> Floor  
Los Angeles, CA 90015

**RESPONSE TO REQUEST FOR TEMPORARY REVISION OF THE MONITORING AND REPORTING PROGRAMS FOR HYPERION WATER RECLAMATION PLANT (NPDES NO. CA0109991, ORDER NO. R4-2023-0033) AND TERMINAL ISLAND WATER RECLAMATION PLANT (NPDES NO. CA0053856, ORDER NO. R4-2021-0095)**

Dear Barbara Romero:

On June 5, 2023, the Los Angeles Regional Water Quality Control Board (Los Angeles Water Board) received a letter from the City of Los Angeles' LA Sanitation and Environment (LASAN), requesting that the Los Angeles Water Board and the United States Environmental Protection Agency (U.S. EPA) approve a temporary revision of the Monitoring and Reporting Programs for NPDES Order Nos. R4-2023-0033 and R4-2021-0095 for the Hyperion and Terminal Island WRPs, respectively. In exchange for these temporary modifications, LASAN proposes to conduct additional monitoring to support the Southern California Bight regional monitoring effort.

LASAN proposes to exchange several sediment monitoring requirements in the Hyperion and Terminal Island WRP NPDES permits in the third quarter of 2023 to devote more resources to the Bight '23 regional monitoring effort, including sediment acute toxicity testing at 23 stations, field sampling at 27 stations, infaunal analyses at 44 stations, physical/chemical analyses (grain size, TOC/TN, metals, chlorinated hydrocarbons, polyaromatic hydrocarbons (PAHs) and PCB congeners) at 30 stations, trawling at 22 stations for fish and megainvertebrates, and 70 mollusk tissue samples (PCB congeners, DDT isomers and metabolites, mercury, and selenium).

The Los Angeles Water Board staff reviewed LASAN's proposal for the temporary modifications to the monitoring and reporting programs for these two facilities and finds the proposal to be reasonable. The Los Angeles Water Board hereby approves LASAN's resource exchange proposal for the Hyperion and Terminal Island WRPs dated June 5, 2023. Before implementing the proposal, LASAN is required to submit the final coordinates of all Bight '23 sediment monitoring stations to the Los Angeles Water Board. Once the proposed coordinates are submitted for all monitoring stations, LASAN may initiate the proposed exchange. U.S. EPA will respond separately to this request.

NORMA CAMACHO, CHAIR | SUSANA ARREDONDO, EXECUTIVE OFFICER

We appreciate your continued participation in the Southern California Bight comprehensive monitoring program. If you have any questions about the monitoring program requirements, please contact Xiaofei Cui at [xiaofei.cui@waterboards.ca.gov](mailto:xiaofei.cui@waterboards.ca.gov) or 213-576-6696 for HWRP, or Don Tsai at [don.tsai@waterboards.ca.gov](mailto:don.tsai@waterboards.ca.gov) or 213-576-6681 for TIWRP.

Sincerely,

for Susana Arredondo  
Executive Officer  
Los Angeles Regional Water Quality Control Board
