Good morning, Marisol,

I wanted to inform you that we are currently piling our dry solids in pond #4 for disposal later this month. I am waiting for Waste Management to finalize our waste profile before I can schedule a disposal date for the solids. Regarding the new pond monitoring program in the new permit (E-28), I wanted to give you a 30-day notice of inspection in case you'd like to schedule a visit. Ponds three and four will be empty this year for inspection. You can schedule a visit at any time; just be mindful of the weather. As you know, the ponds hold all precipitation, so even a small amount of rain could limit the window to inspect the asphalt bottoms. I will conduct an internal inspection as required by the permit, including photos and descriptions. If you cannot make it out, these will be included with the annual operations report.

Let me know if you have any questions or comments. Have a great day.

Thank you

Nick Jones
