Alturas, CA 96101

NOTICE OF APPLICABILITY (NOA), WATER QUALITY ORDER 2014-0153-DWQ-R5176, CALIFORNIA PINES COMMUNITY SERVICES DISTRICT, MODOC COUNTY

In February 2014 the California Pines Community Services District (hereafter "Discharger") responded with information pertaining to the Central Valley Regional Water Board (Central Valley Water Board) staff's request for updated information for the domestic wastewater treatment and disposal system at their facility in Modoc County.

Based on the information provided, the facility treats and disposes of less than 100,000 gallons of wastewater per day, and is therefore eligible for coverage under the general and specific conditions of State Water Resources Control Board (State Water Board) Water Quality Order 2014-0153-DWQ *General Waste Discharge Requirements for Small Domestic Wastewater Treatment Systems* (General Order). This letter serves as formal notice that the General Order is applicable to your facility and the wastewater discharge described below. You are hereby assigned General Order 2014-0153-DWQ-R5176 for your facility.

You should familiarize yourself with the entire General Order and its attachments enclosed with this letter, which prescribes mandatory discharge and monitoring requirements. Sampling, monitoring, and reporting requirements that are applicable to your treatment and disposal methods must be completed in accordance with the sections of the General Order Attachments: *Monitoring and Reporting Program (MRP)* and *Standard Provisions*.

REGULATORY BACKGROUND

Waste Discharge Requirements (WDRs) 94-047 were adopted for this facility by the Central Valley Water Board on 25 February 1994. The existing MRP requires monthly reporting of wastewater flow, dissolved oxygen, and pond water depth.

DISCHARGE DESCRIPTION

The California Pines Community Services District operates a wastewater collection and treatment facility located southwest of Alturas, near State Highway 299 in Section 10, Township 41 North, Range 11 East, MDB&M in Modoc County. The wastewater treatment system is comprised of a collection system with lift stations and two treatment ponds, seasonal use septic tank/leachfield systems. The location is shown in Attachment A of this letter.

FACILITY SPECIFIC REQUIREMENTS

The Discharger will maintain exclusive control over the discharge, and shall comply with the terms and conditions of this NOA and the General Order 2014-0153-DWQ-R5176, with all attachments. Failure to comply with the requirements in the documents could result in an enforcement action as authorized by provisions of the California Water Code. Discharge of wastes other than those described in this NOA is prohibited. If the method of waste disposal changes from that described in this NOA, you must submit a new Report of Waste Discharge describing the new operation.

The required annual fee specified in the annual billing from the State Water Board shall be paid until this NOA is officially terminated. You must notify this office in writing if the discharge regulated by the General Order ceases, so that we may terminate coverage and avoid unnecessary billing.

Please note that WDRs Order No. 94-047 is proposed to be rescinded at the 4/5 December 2014 meeting of the Central Valley Water Board. Upon rescission of your individual WDRs, coverage for your facility under the General Order shall become applicable subject to this Notice of Applicability.

If you have any questions regarding submitting an updated report of waste discharge, making changes to your permitted operations, compliance or enforcement please contact Stephen Rooklidge at (530) 224-4205, Stephen.Rooklidge@waterboards.ca.gov, or the footer address.
