Subject: FW: Pretreatment Surcharge (5D150100001 and 5D150100002)

Rosanne – I reviewed this with my management and was informed that entities (such as the City of Bakersfield) that have multiple permits with an approved pretreatment program only needs to pay the \$10,000 surcharge once. Typically it will be added to a selected permit while the other will not have it.

The recently issued invoices for the two permits in question:

5D150100001 (WWTP #2) – WD0091031 issued 10/30/2013 - \$33,079
5D150100002 (WWTP #3) – WD0091032 issued 10/30/2013 - \$33,079

Both included the \$10,000 surcharge. We will work with Anthony to modify one of the invoices to remove the surcharge.

Anthony – CIWQS needs to be updated for one of the permits to have the surcharge removed. The pretreatment field needs to be changed. Once this is done, please submit a Form X to have the invoice updated for the lower fee amount.

Subject: Pretreatment Surcharge

Hi David,

Rosanne Padley (cc'd in this email) from the City of Bakersfield asked a question regarding the city of Bakersfield's pretreatment program for two facilities. There is one program for both facilities. The pretreatment surcharge language is as follows:

"Public wastewater treatment facilities with approved pretreatment programs are subject to a surcharge of \$10,000. Agencies with multiple facilities under one approved pretreatment program shall pay a \$10,000 surcharge per program."

The WDIDs are 5D150100001 and 5D150100002.

Should each of the Facilities be charged a \$10,000 surcharge?

Are the CIWQS records correct?
