Edmund G. Brown Jr.
Governor

14 June 2011

Mr. Peter Dean, Regulatory Specialist
City and County of San Francisco
San Francisco Public Utilities Commission
P.O. Box 160
Moccasin, CA 95347

NOTICE OF APPLICABILITY

**WATER QUALITY ORDER NO. 97-10-DWQ, GENERAL WASTE DISCHARGE
REQUIREMENTS FOR DISCHARGES TO LAND BY SMALL DOMESTIC WASTEWATER
TREATMENT SYSTEMS, CITY AND COUNTY OF SAN FRANCISCO, HETCH HETCHY
WATER AND POWER DIVISION, O'SHAUGHNESSY WASTEWATER TREATMENT
FACILITY, TUOLUMNE COUNTY**

The O'Shaughnessy Wastewater Treatment Facility (WWTF) includes a lift station, septic tanks, and leach/spray fields. Waste Discharge Requirements (WDRs) Order No. 91-189 currently regulates WWTF discharges. The WDRs are obsolete, inconsistent with current plans and policies of the California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board), and need to be updated.

On 20 April 2011, Central Valley Water Board staff received your letter requesting coverage of the discharge under *Water Quality Order No. 97-10-DWQ, General Waste Discharge Requirements for Discharges to Land by Small Domestic Wastewater Treatment Systems* (hereafter General Order).

Based on the findings of the original WDRs, information from self-monitoring reports and facility file, and information provided in your request, the discharge meets the conditions of the General Order. The discharge is hereby covered under *Water Quality Order No. 97-10-DWQ, General Waste Discharge Requirements for Discharges to Land by Small Domestic Wastewater Treatment Systems*. The facility is assigned Notice of Applicability (NOA) No. 97-10-DWQ-R5076.

The following requirements contained within the General Order apply to the subject discharge:

1. All Section A Prohibitions,
2. Section B Requirement Nos. 1.a-1.d, 2.a-2.c, 5.a-5.b, and 6.a-6.d;
3. All Section C Ground Water and Surface Water Limitations;
4. Section D Provision Nos. 1.a-1.v, 2.a-2.b, and 4; and
5. All Attachment B Standard Provisions and Reporting for Waste Discharge Requirements.

The following sections of Attachment A Monitoring and Reporting Program (MRP) No. 97-10-DWQ, apply to the discharge:

1. Septic Tank Monitoring, and
2. Reporting.

LOCATION

The Hetch Hetchy Water and Power Division operates the WWTF near the Hetch Hetchy Reservoir in Section 16, T1N, R20E, MDB&M of Yosemite National Park. The surface drainage for the area accumulates in the Tuolumne River.

The WWTF is in the San Joaquin River Basin. The *Water Quality Control Plan for the Sacramento and San Joaquin River Basins, Fourth Edition* (hereafter Basin Plan), designates beneficial uses, establishes water quality objectives, and contains implementation programs and policies to achieve water quality objectives for all waters of the Basin.

DESCRIPTION

The treatment and disposal facilities consist of a lift station, septic tanks, a leach field, and a spray disposal field. Disposal is through either the leach field, spray field, or both as determined by the facility operator.

The discharge averages 0.007 mgd and a maximum of 0.010 mgd of domestic wastewater. The domestic wastewater is generated from a complex of cottages and public restrooms in the O'Shaughnessy Dam area. The cottages provide housing for staff stationed at the O'Shaughnessy Dam area, guests lodging within the cottages, and visitors who use the public restrooms. Design flow is 0.02 mgd. The WWTF operates 24 hours a day, 365 days per year. Peak flows occur during the summer months and coincide with increase occupancy rates of the guest cottages and visitors to the area.

The natural surface water near the site is the Tuolumne River. The beneficial uses of underlying groundwater identified in the Basin Plan are: municipal and domestic supply, industrial service supply, industrial process supply, and agricultural supply.

FACILITY-SPECIFIC REQUIREMENTS

In addition to the above requirements, the City and County of San Francisco must comply with the following:

1. Discharge of wastewater at a location or in a manner different from that described above is prohibited.
2. The WWTF shall be operated in accordance with the requirements contained in the General Order.
3. The waste discharge shall not enter surface waters or surface water drainage courses.
4. The City and County of San Francisco shall submit the required annual fee (as specified in the annual billing issued by the State Water Resources Control Board), until the NOA is officially terminated.
5. Failure to abide by the conditions of the General Order and this letter authorizing applicability, including its monitoring and reporting requirements, could result in enforcement actions, as authorized by provisions of the California Water Code.

If you have any questions regarding this NOA, please contact Dale Harvey at (559) 445-6190.

Pamela C. Creedon

Executive Officer
