TYPOGRAPHICAL CORRECTION FOR WASTE DISCHARGE REQUIREMENTS (WDRs) AND NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT – CITY OF OXNARD, OXNARD WATER RESOURCE RECOVERY FACILITY, OXNARD, CA (NPDES PERMIT NO. CA0054097, CI-2022)

Dear Tim Beaman:

On May 10, 2024, the Los Angeles Regional Water Quality Control Board (Los Angeles Water Board) transmitted the revised tentative WDRs and NPDES permit, which was adopted on May 23, 2024. Attachment E (Monitoring and Reporting Program or MRP), section 10.4.11. of the adopted permit specifies chronic sediment toxicity monitoring and references section 8.2.1.3. of the MRP for detailed requirements. However, there is no such section in the MRP. The section in the MRP that discusses sediment toxicity monitoring is section 8.2.2. In addition, section 8.2.2. requires acute sediment toxicity monitoring, as corrected in the response to comments which were transmitted with the revised tentative WDRs and NPDES permit. Therefore, the Los Angeles Water Board has determined that these discrepancies are typographical errors.

The Los Angeles Water Board has modified the adopted Order (Order No. R4-2024-0252) to correct these minor typographical errors pursuant to 40 CFR section 122.63:

Attachment E, section 10.4.11 shall read as follows:

10.4.11. Sediment Toxicity TIE Work Plan

The Permittee shall conduct ~~chronic~~ acute sediment toxicity monitoring. If persistent toxicity is observed at a sediment sampling location, a Phase I TIE shall be conducted as defined in the Sediment Toxicity Identification (TIE) Phase I, II, and III Guidance Document (EPA/R-07/080). The Permittee shall submit a Sediment Toxicity TIE Work Plan within 90 days of the effective date of this Order. Refer to MRP section ~~8.2.1.3.~~ 8.2.2. for detailed requirements.

If you have any questions, please contact Danielle Robinson at danielle.robinson@waterboards.ca.gov or at (213) 576-6656 or Steven Webb at steven.webb@waterboards.ca.gov or at (213) 576-6793.

Sincerely,

Jenny Newman
